EXAMINER'S AMENDMENT ✓

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Snell on December 6, 2007.

The application has been amended as follows:

IN THE CLAIMS

For claim 2 line 16, the phrase "transceivers." has been replaced with --transceivers, wherein isolating the plurality of remote PLC transceivers from each other during the at least one upstream time slot comprises, for each of the plurality of remote PLC transceivers, using a different combination of one or more carriers and one or more symbol lengths for transmitting PLC signals to the head-end PLC transceiver.--.

For claim 13 line 17, the phrase "transceivers." has been replaced with --transceivers, wherein each of the plurality of remote PLC transceivers is configured to use different combination of one or more carriers and one or more symbol lengths for transmitting PLC signals to the head-end PLC transceiver.--.

Claims 27 and 33 are now cancelled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claim 2 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose isolating the plurality of remote PLC transceivers from each other during the at least one upstream time slot comprises, for each of the plurality of remote PLC transceivers, using a different combination of one or more carriers and one or more symbol lengths for transmitting PLC signals to the head-end PLC transceiver. Therefore, the prior art of record fails to show or render obvious the above underline limitations as claimed.

Claim 13 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose each of the plurality of remote PLC transceivers is configured to use different combination of one or more carriers and one or more symbol lengths for transmitting PLC signals to the head-end PLC transceiver.

Therefore, the prior art of record fails to show or render obvious the above underline limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zalitzky et al. (US 6,995,657 B2) is cited to show a power line communication system the transfer data frames between communicating transceivers by isolating the communicating transceivers from other transceivers comprised in the data transmission network.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Mui whose telephone number is (571) 270-1420. The examiner can normally be reached on Mon. - Thurs. 9 - 3 EST.
